### Pokemon (endpoint)

Pokémon are the creatures that inhabit the world of the Pokémon games. They can be caught using Pokéballs and battling with other Pokémon. Each Pokémon belongs to a specific species but may take on a variant which makes other Pokémon of the same species, such as base stats, available abilities and typings. See [Bulbapedia](#) for greater

**POKÉMON**  
Gotta catch 'em all!

# LIMITATIONS

- The difficulty to use data extracted directly from external API
- Unable to understand some other data given and its relationships

# IMPROVEMENTS

- Include pre-filled information feature for typing pokemon name
- Include all pokemon data

**POKÉMON**  
Gotta catch 'em all!

**Good luck Trainer!**
